

## LONDON DSA WORKSHOP 2013

### AUDIONOTETAKER VS AUDIONOTEBOOK

Note taking software is one of the most popular tools among DSA Students. This workshop will see the developers of the two note taking packages present their latest software versions, and take questions and feedback from attendees.

### SAMSON GO MICS

The number of students taking computers into lectures is increasing. By using a combination of Notetaking software and high quality USB microphones, students can record the audio and simultaneously type up notes. This workshop will present the results of Quality Tests comparing the Go Mics with Dictaphones and Livescribe Pens. It will also outline how the miniature Mics integrate with software, hardware and learning techniques.

### ACCESSIBILITY ON OSX AND WINDOWS 8

Windows 8 and Mac OSX offer extensive accessibility features including magnification tools, speech feedback, screen reading and voice input. A former Apple Workshop presenter will go head to head with a proponent for Windows. Which operating system will come out on top?

### DSA STUDENT FEEDBACK

A look at data collected from DSA students, followed by a by a former DSA student's account of the DSA and an excerpt from his film. A short presentation about potential evolutions of the DSA quote system, which will feed into an open discussion, and Q&A with Graham Tranter.
